

The Magical Pencil

Once upon a time there lived a young boy named Vijay. He is very interested in planting trees. He planted about 1500 trees in 2 years. His goal is to plant 10,000 trees in 3 years. He tried many times but he could not do it. One day while walking he saw some young boys like him and they became friend with him. While they all were going a grandma asked to drop her in the corner of the street. The grandma gave a pencil and said "it is the magical pencil whatever you draw will become real". At first they drew a lot of money and it came. Using that money they bought and they sowed seeds all over the land. Within 2 years it became trees. He and his friends achieved their goal within 2 years and they were very happy!

Moral: Unity is the strength

Thank you.
